

## Bollard Hitch Series Rack - Surface Mount Installation

### Tools Needed for Installation

Tape Measure  
Marker or Pencil  
Masonry Drill Bit Drill (Hammer drill recommended)  
Hammer  
Wrench  
Level  
Washers (for leveling if necessary)

### Recommended Install Base Materials

Solid concrete is the best base material for installation. Determine which anchor is appropriate for your application to ensure the proper anchors are included with your rack. Be sure nothing is underneath the base material that could be damaged by drilling.

### Installation

3/8" anchors are shipped with the rack. Place the rack in the desired location. Use a marker or pencil to outline the holes of the flange onto the base material. Drill the holes in accordance with the specifications shipped with the anchors. Make sure the holes are at least 6" away from any cracks in the base material.
