

BIKE RACKS

Varsity®

CAMPUS-UNIVERSITY BIKE RACKS

The ASLA award winning Varsity Campus Bike Dock is currently the bicycle parking solution of choice on over 100 campuses and growing daily. The Varsity's offset wheel pockets emphasize an organized and adaptive footprint for maximizing or limiting the number of bikes in an area. This is accomplished without compromising ease of use or security. The Varsity bike rack is a thoughtfully designed parking solution for any environment. Customize your guards with color, branding or educational statements, This allows for a personalized look without the additional costs of custom coloring just the rack.

Product Features

- Best selling Campus University bike rack in the country.
- Campus standard on over 100 universities
- Wheel-troughs cradle bicycle & e-bike tires while preventing slipping & tipping
- Handlebars are offset to prevent conflict and allow for high density parking
- Black injection molded urethane Smart Guards protect bicycles from metal-to-metal damage
- Customize your guard with color, branding or messaging, not the rack. Varsity exterior finish is either black powder or galvanized
- Case-hardened steel locking loops allow U-locks to secure bicycles at 3-points of contact, locking bike frame and tire to rack, for the highest security
- Educational QR tag, plays “how to lock your bike” video on your phone
- College campus bicycle rack of choice in over 100 universities nationwide
- Surface mounted only. See MBA Bike Dock for freestanding and rail installations
